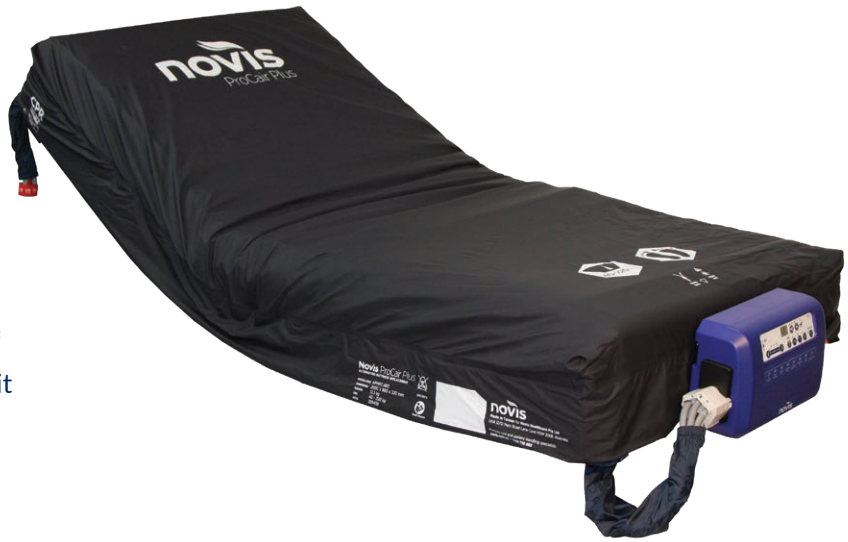
novis ProCair Plus



Designed with the latest in technical innovation, our feature-rich products deliver healthcare professionals a complete range of alternating pressure mattress solutions to suit long term and acute care environments.

AutoCair
Automatic weight sensing technology that delivers fail safe patient comfort levels. No more concerns over correct pressure level settings. Manual adjustments can still be made.

✓ Real-time

Quicker Release CPR access
Easier quick twist mechanism located at the head of the mattress. Makes it easier to rapidly deflate the mattress for emergency CPR requirements.

✓ Quick Twist

Fowler Boost
Adjusts mattress pressure to provide increased support under the sacral area when backrest is raised.

✓ Automatic

SafetyCair
The ultimate protection from 'bottoming out', alternating air cells contain a lower 'safety cell' which remains fully inflated to provide greater surface stability and patient safety.

✓ Air Cell

HeelCair
Independent heel zone made up of narrower cells. Designed for individualised therapy to the 'at risk' heel and lower leg area.

✓ Disconnectable

ClimateCair
ClimateCair cells are constructed from thermoplastic polyurethane (TPU) material. Not only softer to the touch, the cells offer enhanced heat retention qualities, to maximise patient comfort.

✓

CairAlert
Be alerted when your patient leaves the bed with a warning alarm that, when activated, will signal the carer that the patient has left the mattress. Ideal for patients with cognitive dysfunction.

✓

FailSafe
An inbuilt Back Up Battery unit provides emergency back up power for continuous operation up to 5 hours. Also ideal for alternating therapy during extended patient transportation periods.

✓

- Premium solution for high risk patients
- Optimal patient therapy and comfort
- Fully automated operational features
- Advanced safety features including back-up battery
- Advanced error and service indicators
