

# VELA 'Turn' Thorax chair

SMALL BACKREST STABILISES THE PATIENT WITHOUT BEING IN THE WAY WHEN X-RAYS ARE TAKEN

ARMRESTS CAN BE FOLDED DOWN TO SEAT LEVEL TO MAKE TRANSFERS EASIER AND PROVIDE AN EXTRA-WIDE SEATING SURFACE

Item no. 70031

The VELA 'Turn' Thorax chair is designed for thoracic X-rays, where the patient must be stabilised to obtain correct images

:: **Lockable seat rotation** (45°/90° right and left) and **fold-down armrests** allow easy access to capture X-ray images from multiple angles. The patient is placed at the apparatus and the armrests are folded down.

:: Armrests and backrests can be adjusted low to provide **optimal whole thorax images**

:: Seat height can be adjusted for **exact patient positioning**

:: Foot pedal locking system and electronic handset height adjustment ensure **optimal ergonomic working positions** for your staff

:: **Patient transfers** are made **easier** because armrests can be folded down

:: Patients can be quickly and securely seated and the chair base locked for **effective adaptation** to medical devices

:: Gliding wheels make it **easy to move** the chair and position the patient on all floor types

ROTATION HANDLE ON BOTH SIDES

ELECTRIC HEIGHT ADJUSTMENT ENSURES EASY AND CORRECT PATIENT PLACEMENT IN RELATION TO MEDICAL DEVICES

BATTERY INDICATOR

LOCKING THE CHAIR BY FOOT PEDAL SECURES THE PATIENT IN POSITION

GLIDING WHEELS MAKE LIGHT WORK OF MOVING THE CHAIR

## Benefits

### Reduce Clinician's injury risk

- Avoid back & shoulder strains
- Improved posture reduces tiredness
- Easily stabilise & adjust the patients height & posture in front of imaging equipment.

### Improve patients safety & positioning

- Assists patients unsteady on their feet
- Easier transfers for wheelchair & walker users with electric height adjustment & flip down armrests.
- Reduces patient falls risk.

### Faster Imaging for efficiency

- Increase patient flow while securing high-quality X-ray imaging.
- Increase the number of assessments.
- The chair with a patient can easily be moved around the room between equipment.
- Electric height adjustment and seat angle can be quickly achieved safely.
